

AGE-DEFYING RADIANCE & *luminosity*

Based on the latest available technology, LUMINESCE™ cellular rejuvenation serum

makes a powerful debut as the first anti-aging product that supports your body's natural ability to renew, restore, and rejuvenate your skin. Using an exclusive patent-pending formula derived from adult stem cells that contains over 200 key human growth factors and cellular messengers, LUMINESCE™ cellular rejuvenation serum gently transforms your skin and minimizes the appearance of fine lines and wrinkles. Look younger, healthier, and more radiant as this revolutionary serum helps you restore life to your skin.

As you age, the production of growth factors within your skin is reduced, intensifying the visible effects of aging. Now you can shed years off of your appearance by re-introducing these factors through the daily application of LUMINESCE™ cellular rejuvenation serum. The growth factors and cellular messengers provided by the stem cell technology work with the natural processes of your skin to support rejuvenation and decrease the appearance of fine lines and wrinkles.

LUMINESCE™ cellular rejuvenation serum

reveals a more luminous, smooth, and firm you. With a noticeable reduction in the appearance of fine lines and wrinkles, this advanced skin care formula works around the clock to help you regain your youthful confidence by providing remarkable and safe results.
